

## Workplace Modifications

### How does it work?

When you employ a Catalyst Employment Service Jobseeker they may be eligible for financial assistance in the form of Workplace Modifications up to the value of **\$30,000**.

A Workplace Modification is an adjustment that is needed in your workplace to help the Jobseeker do their job and is subject to meeting eligibility and application requirements for the funds to be available.

Workplace Modification financial assistance can be used to purchase any of the following types of assistance and is based on the Jobseeker's unique requirements:

- **Physical workplace adjustments that remove barriers to employment**  
E.g. wheelchair accessible toilets and access ramps, noise control devices, automatic doors and alert systems, workstation height adjustments, adjusting locations of shelves, entry switches etc
- **Specific items of work equipment or modifications to existing work equipment**
- **Communication technology devices**
- **Computer software and upgrades**

Please contact **Catalyst** today on **07 3807 5559** if you are interested in employing one of our Jobseeker's or have already employed one of our Jobseeker's and wish to discuss receiving Workplace Modification support.
